

QUICK REFERENCE: AI TREND HUB

Generated: April 13, 2026

Login Credentials

Email	Password	Role	Notes
own-er@aitrendhub.com	trendhub2024	Admin	Auto-login enabled
john@doe.com	johndoe123	Admin	Backup account

Project Location

Project Root: /home/ubuntu/ai_trend_hub
App Code: /home/ubuntu/ai_trend_hub/nextjs_space
Database: PostgreSQL (shared dev/prod)

Quick Start Commands

```
# Start development server
cd /home/ubuntu/ai_trend_hub/nextjs_space && yarn dev

# Build for production
cd /home/ubuntu/ai_trend_hub/nextjs_space && yarn build

# Generate Prisma client
cd /home/ubuntu/ai_trend_hub/nextjs_space && yarn prisma generate

# Push database schema
cd /home/ubuntu/ai_trend_hub/nextjs_space && yarn prisma db push

# Open Prisma Studio (database browser)
cd /home/ubuntu/ai_trend_hub/nextjs_space && yarn prisma studio

# Run seed script
cd /home/ubuntu/ai_trend_hub/nextjs_space && npx tsx scripts/seed.ts
```

Environment Variables

Variable	Purpose
<code>DATABASE_URL</code>	PostgreSQL connection string
<code>NEXTAUTH_SECRET</code>	Session encryption key
<code>ABACUSAI_API_KEY</code>	LLM API for article generation

Key Files to Know

File	What It Does
<code>lib/voice-profile.ts</code>	Jack's voice, IP frameworks, cross-industry apps
<code>app/api/articles/draft/route.ts</code>	Article generation (voice + AIDA + CTAs + industry)
<code>app/api/settings/cta/route.ts</code>	CTA configuration API
<code>app/dashboard/settings/page.tsx</code>	CTA settings UI
<code>components/articles/article-wizard.tsx</code>	4-step article creation wizard
<code>components/articles/article-editor.tsx</code>	Article editor with versioning
<code>lib/rss-parser.ts</code>	RSS feed ingestion
<code>lib/reddit-scraper.ts</code>	Reddit web scraping
<code>lib/job-scheduler.ts</code>	Background refresh (30 min)
<code>prisma/schema.prisma</code>	Database schema (11 models)
<code>app/page.tsx</code>	Login page (auto-login)
<code>app/layout.tsx</code>	Root layout

Jack's 7 IP Frameworks

#	Framework	One-Line Summary
1	Skyscraper Foundation	Build deep before building tall (data foundation first)
2	6-Stage Recruitment Cycle	Documented system: Welcome → Activate → Diagnose → Prescribe → Lifecycle → North Star
3	4 Hire Up Funnels	FOMO Reactivation, Not Qualified Yet, New Activation, Abandoned Application
4	Co-Pilot System	AI accountability that monitors and enforces behavior
5	Improvement Flywheel	Continuous optimization using post-hire performance data
6	Maslow-Based Messaging	Messaging based on hierarchy of needs
7	Hybrid AI Workforce	Humans + AI collaboration > Full automation

Supported Industries (Cross-Industry IP)

1. Recruitment (origin)
2. Sales / B2B
3. E-commerce / Retail
4. Restaurants / Hospitality
5. Healthcare
6. Manufacturing / Logistics
7. Professional Services
8. SaaS

Database Models (11)

1. User (with ctaSettings JSON)
2. Account (NextAuth)

3. Session (NextAuth)
4. VerificationToken (NextAuth)
5. Category
6. Source
7. TrendItem
8. SavedItem
9. Article
10. ArticleVersion
11. JobRun

API Endpoints

Auth: `/api/auth/[...nextauth]` , `/api/signup`

Data: `/api/trends` , `/api/categories` , `/api/saved` , `/api/dashboard/stats`

Jobs: `/api/jobs/refresh` , `/api/init`

Articles: `/api/articles` , `/api/articles/[id]` , `/api/articles/angles` , `/api/articles/outline` , `/api/articles/draft` , `/api/articles/section-regenerate` , `/api/articles/[id]/social-posts`

Settings: `/api/settings/cta`

UI Pages

Route	Purpose
<code>/</code>	Login (auto-login enabled)
<code>/dashboard</code>	Overview with stats and charts
<code>/dashboard/category/[id]</code>	Category detail view
<code>/dashboard/saved</code>	Saved/bookmarked items
<code>/dashboard/articles</code>	Article list
<code>/dashboard/articles/new</code>	Article creation wizard
<code>/dashboard/articles/[id]</code>	Article editor
<code>/dashboard/settings</code>	CTA configuration

CTA System

Access: Dashboard → Settings

Configuration Options:

- Master toggle (enable/disable all CTAs)
- Book promotion (title, description, buy link, price)
- Video/course promotion (title, description, video link)
- Affiliate products (unlimited, with commission disclosure)
- Custom CTAs (unlimited)
- Style: invitational | direct | educational
- Placement: end | middle | both

How It Works:

1. Configure CTAs once in Settings
2. Every generated article automatically includes configured CTAs
3. CTAs written naturally in Jack's voice
4. Proper affiliate disclosures included

**Article Generation Pipeline**

```

Trend Item → Step 1: Basics (audience, goal, tone, format)
              → Step 2: AI Angles (3-5 options, user selects)
              → Step 3: AI Outline (editable, drag-and-drop)
              → Step 4: AI Draft Generation
                  → Voice Profile injection
                  → AIDA Framework (if enabled)
                  → Industry Detection → Cross-Industry IP
                  → CTA Settings injection
                  → Guardrails (anti-salesy, authenticity)
              → Article Editor (edit, version, regenerate sections)
              → Export (Markdown, HTML, .md download)
  
```

**Deployment Status**

Current: NOT deployed to production

To Deploy: Use Abacus AI Agent deployment tool

Database: Shared between dev and production

END OF QUICK REFERENCE
