

USER FRONTEND TEST CHECKLIST — AI Trend Hub

Step-by-Step Testing Guide for All Features

Last Updated: May 7, 2026

TEST ENVIRONMENT

- **URL:** <https://aitrendshub.abacusai.app>
 - **Test Account (Auto-Login):** owner@aitrendhub.com / trendhub2024
 - **Browser:** Chrome, Safari, or Firefox (recent versions)
 - **Screen Resolution:** Test on desktop (1920x1080) and mobile (375x667)
 - **Time Required:** 45-60 minutes for full test suite
-

PRE-TEST SETUP

Before starting, complete these checks:

- ☐ Internet connection is stable
 - ☐ Browser cache is cleared (or use incognito mode)
 - ☐ JavaScript console is open (F12 → Console tab) to catch errors
 - ☐ Have a text editor open to paste test content
 - ☐ Tablet or phone available for mobile testing (optional)
-

TEST SUITE 1: AUTHENTICATION & LOGIN (5 minutes)

Test 1.1: Auto-Login on Homepage

1. ☐ Open <https://aitrendshub.abacusai.app> in a fresh incognito window
2. ☐ Verify you're automatically logged in (no login form shown)
3. ☐ Verify dashboard loads immediately
4. ☐ Check browser console for errors (should be empty)

Expected Result: Dashboard displays without manual login.

Test 1.2: Session Expiry Banner (When Session Expires)

1. ☐ Wait for session to expire OR manually navigate to `/?expired=true`
2. ☐ Verify amber banner appears: “ **Session expired — please sign in**”

3. [] Verify banner is above the login form
4. [] Click on email field and login again
5. [] Verify banner disappears after successful login

Expected Result: Clear session expiry message, successful re-login.

Test 1.3: Logout & Confirmation

1. [] From the dashboard, click **"Logout"** button (top-right header)
2. [] Verify redirect to login page
3. [] Verify blue banner appears: "👏 **You have been logged out successfully.**"
4. [] Verify you're not automatically logged in
5. [] Manually login again

Expected Result: Logout message appears, auto-login does NOT occur.

✅ TEST SUITE 2: DASHBOARD OVERVIEW (10 minutes)

Test 2.1: Dashboard Loads & Stats Display

1. [] Navigate to <https://aitrendshub.abacusai.app/dashboard>
2. [] Verify page title is "Dashboard"
3. [] Verify the following stats appear:
 - [] **Total Trend Items** (number in blue box)
 - [] **New Today** (number in blue box)
 - [] **Saved Items** (number in blue box)
4. [] Verify **Category Breakdown** chart shows categories
5. [] Verify **AI Buzz - Last 7 Days** time-series chart displays

Expected Result: Dashboard fully loads with all statistics and charts.

Test 2.2: Onboarding Modal (First Visit)

1. [] Clear browser localStorage (DevTools → Application → Local Storage → Clear All)
2. [] Refresh dashboard page
3. [] Verify **Onboarding Modal** appears with 3 steps
4. [] Click **Next** to advance through steps
5. [] Click **Get Started** on final step
6. [] Verify modal closes and dashboard is visible
7. [] Refresh page — verify modal does NOT appear again

Expected Result: 3-step onboarding displays once, then stored in localStorage.

Test 2.3: Filters & Search

1. [] Verify **Filter Panel** on left side shows:
 - [] Time Range dropdown (24h, 7d, 30d, all)
 - [] Category dropdown
 - [] Search input field
2. [] Change **Time Range** to “7d” — verify list updates
3. [] Select a **Category** — verify items filter
4. [] Type in **Search** field — verify debounce works
5. [] Clear search field — verify all items reappear

Expected Result: All filters work without page reload.

Test 2.4: Trend Cards Display

1. [] Scroll down to **Recent Items** grid
2. [] For each visible trend card, verify:
 - [] **Title** is displayed
 - [] **Source** name appears
 - [] **Summary** text is shown
 - [] **Tags** (AI keywords) appear
 - [] **Freshness Badge** appears (emerald/blue/amber/zinc)
 - [] **Score badge** appears (1-100)
 - [] **Save button** (bookmark icon) is present
 - [] **“Write Article”** button is present
3. [] Verify cards are responsive (stack on mobile)

Expected Result: All card elements visible and properly styled.

Test 2.5: Freshness Badges (NEW SESSION 5)

1. [] Look at **Recent Items** cards
2. [] Identify badges on multiple cards:
 - [] **Emerald badge** — for items <6 hours old
 - [] **Blue badge** — for items 6-24 hours old
 - [] **Amber badge** — for items 1-3 days old
 - [] **Zinc badge** — for items >3 days old
3. [] Hover over badge to see tooltip with relative time
4. [] Verify badge colors match recency

Expected Result: All 4 color tiers visible; freshness logic is correct.

Test 2.6: Save/Bookmark Functionality

1. [] Click **Save button** on a trend card
2. [] Verify button changes color (filled/highlighted)
3. [] Verify toast: “Saved to your library”
4. [] Navigate to **Saved Items** page

5. ☐ Verify saved item appears
6. ☐ Go back to **Dashboard**
7. ☐ Unsave the item (click bookmark again)
8. ☐ Verify it's removed from **Saved Items**

Expected Result: Save/unsave works bidirectionally.

TEST SUITE 3: ARTICLE CREATION WIZARD (15 minutes)

Test 3.1: Start Article Wizard

1. ☐ On dashboard, click **“Write Article”** button
2. ☐ Verify redirect to **Article Wizard** page
3. ☐ Verify progress bar shows 4 steps (Basics, Angle, Outline, Draft)
4. ☐ Verify **“Save Draft & Exit”** button appears (top-right)

Expected Result: Wizard loads with progress bar and save draft button.

Test 3.2: Step 1 — Configure Basics

1. ☐ Verify form fields appear:
 - ☐ **Audience** dropdown
 - ☐ **Goal** dropdown
 - ☐ **Tone** dropdown
 - ☐ **Format** dropdown
 - ☐ **Language** dropdown
 - ☐ **AIDA Framework** toggle
2. ☐ Change **Audience** to “Sales Teams”
3. ☐ Change **Goal** to “Thought Leadership”
4. ☐ Change **Tone** to “Bold”
5. ☐ Change **Format** to “Deep Dive”
6. ☐ Toggle **AIDA Framework** ON
7. ☐ Click **Next** button
8. ☐ Navigate back to Step 1 — verify all selections persist

Expected Result: All form fields work and persist.

Test 3.3: Step 2 — Choose Angle

1. ☐ Verify 3-5 **angle options** appear with descriptions
2. ☐ Click on one angle to select it
3. ☐ Click **Next** to proceed to Step 3

Expected Result: Angles load and can be selected.

Test 3.4: Step 3 — Review Outline

1. [] Verify **outline structure** appears with sections
2. [] Try to edit a section title — verify text input works
3. [] Click **Next** to proceed to Step 4

Expected Result: Outline displays and is editable.

Test 3.5: Step 4 — Generate Draft (Streaming)

1. [] Click **Generate Draft** button
2. [] Verify **streaming animation** starts
3. [] Verify article content **streams in real-time**
4. [] Verify **Jack Whatley's voice** is maintained
5. [] Wait for generation to complete (30-60 seconds)
6. [] Verify **"Draft Complete!"** message appears

Expected Result: Article generates with real-time streaming.

Test 3.6: Save Draft & Exit (NEW SESSION 5)

1. [] While on ANY step of the wizard, click **"Save Draft & Exit"** button
2. [] Verify **loading spinner** appears on button
3. [] Verify toast: **"Draft saved! You can resume later from the Articles page."**
4. [] Verify redirect to **Articles** page
5. [] Find the newly saved draft
6. [] Verify it has a **blue "Resume" button** (not "Edit")
7. [] Click **Resume** button
8. [] Verify you're back at the same wizard step
9. [] Verify all form fields contain your previous selections
10. [] Verify you can continue from that step

Expected Result: Draft saves at any step; Resume returns to exact step with all data.

TEST SUITE 4: ARTICLE EDITOR (12 minutes)

Test 4.1: Open Article Editor

1. [] Complete the article wizard or open a saved article
2. [] Verify redirect to **Article Editor** page
3. [] Verify **article title** is editable
4. [] Verify **article content** is in markdown format
5. [] Verify **action panel** on right side with buttons

Expected Result: Editor loads with full editing interface.

Test 4.2: Edit Article Content

1. [] Click into article **title** field
2. [] Modify the title
3. [] Verify title updates in real-time
4. [] Scroll to article body and **edit text**
5. [] Add a new paragraph or section
6. [] Use **bold** and **italic** markdown syntax
7. [] Verify markdown preview updates

Expected Result: Title and content are fully editable.

Test 4.3: Generate Social Posts

1. [] Click **“Generate Social Posts”** button
2. [] Select platforms: **Twitter/X, LinkedIn, Facebook**
3. [] Click **Generate**
4. [] Verify **loading spinner** appears
5. [] Wait 20-30 seconds for posts
6. [] Verify **3 post cards** appear (one per platform)
7. [] Verify each post displays: platform name, text, character count

Expected Result: Posts generate for all selected platforms.

Test 4.4: Social Media Preview Cards (NEW SESSION 5)

1. [] After posts generate, look for toggle buttons: “Edit Mode” and “Platform Preview”
2. [] Click **“Platform Preview”** button
3. [] Verify cards transform to show **platform-specific styling**:
 - [] **Twitter/X** — black background, verified badge, engagement bar
 - [] **LinkedIn** — white/light background, professional header
 - [] **Facebook** — dark background, share preview styling
4. [] Verify each platform looks realistic
5. [] Click **“Edit Mode”** to toggle back

Expected Result: Platform previews display accurately for all 3 platforms.

Test 4.5: Edit Social Posts

1. [] In **Edit Mode**, click on a social post
2. [] Verify post **text becomes editable**
3. [] **Add some text** to the post
4. [] Verify **character count updates live**
5. [] Watch for color changes: Green (safe), Yellow (approaching), Red (over)
6. [] Click **Copy** button
7. [] Verify toast: “Copied to clipboard”

Expected Result: Posts are editable with live character count warnings.

Test 4.6: Export Article

1. ☐ Click **“Export”** button
2. ☐ Verify dropdown menu appears with options
3. ☐ Click **“Download as Markdown”**
4. ☐ Verify `.md` file downloads
5. ☐ Open file to verify format
6. ☐ Click **“Export”** again
7. ☐ Click **“Download as HTML”**
8. ☐ Verify `.html` file downloads
9. ☐ Open in browser to verify styling

Expected Result: Both Markdown and HTML exports work.

TEST SUITE 5: ARTICLE LIST & PUBLISH STATUS (10 minutes)

Test 5.1: Article List Page Loads

1. ☐ Navigate to **Dashboard → Articles**
2. ☐ Verify page title is “Articles”
3. ☐ Verify list of articles appears
4. ☐ Verify articles are sorted by date (most recent first)
5. ☐ Verify **search and filter options** appear

Expected Result: Articles page loads with full list.

Test 5.2: Publish Status Indicators (NEW SESSION 5)

1. ☐ On article list, look for **status badges** on each card
2. ☐ Identify badges with icons:
 - ☐ **Green badge with Globe icon** — Published articles
 - ☐ **Red badge with AlertTriangle icon** — Failed publish
 - ☐ **Gray badge with Edit3 icon** — Draft articles
 - ☐ **Amber badge** — Incomplete drafts
3. ☐ For **Published articles**, verify **published date** appears below badge
4. ☐ For **Failed articles**, hover over badge
5. ☐ For **Incomplete drafts**, verify **blue “Resume” button** is present
6. ☐ For **regular drafts**, verify **gray “Edit” button** is present

Expected Result: All 4 status states visible with correct icons.

Test 5.3: Resume vs Edit Buttons

1. ☐ Find an **incomplete draft** article (amber badge)
2. ☐ Verify **“Resume” button** (blue) is shown
3. ☐ Click **Resume**
4. ☐ Verify wizard opens at the exact step you left off
5. ☐ Go back to article list
6. ☐ Find a **complete draft** or **published article**
7. ☐ Verify **“Edit” button** (gray) is shown
8. ☐ Click **Edit**
9. ☐ Verify editor opens (not wizard)

Expected Result: Resume shows for incomplete drafts; Edit for complete articles.

TEST SUITE 6: CTA MANAGEMENT (8 minutes)

Test 6.1: Navigate to Settings

1. ☐ Click **Dashboard → Settings**
2. ☐ Verify **Settings** page loads
3. ☐ Verify **CTA Settings** section appears
4. ☐ Verify **Master CTA Toggle** is visible

Expected Result: Settings page loads with CTA section.

Test 6.2: Configure CTAs

1. ☐ Toggle **Enable CTAs** to ON
2. ☐ Fill in:
 - ☐ Book: “Reshaping Recruitment” title
 - ☐ Amazon link
 - ☐ Price
3. ☐ Fill in optional fields
4. ☐ Verify **CTA Style** dropdown has options (Invitational, Direct, Educational)
5. ☐ Select **“Invitational”** style
6. ☐ Verify **CTA Placement** dropdown (End, Middle, Both)
7. ☐ Select **“End”** placement
8. ☐ Click **Save Settings**
9. ☐ Verify toast: “Settings saved successfully”

Expected Result: All CTA fields saveable with confirmation.

Test 6.3: CTA Preview

1. ☐ Scroll to **Active CTA Preview** section
2. ☐ Verify all configured CTAs are displayed

3. ☐ Verify each CTA shows **validation status**:

- ☐ Green checkmark ✓ = valid URL
- ☐ Red alert ⚠ = invalid URL

4. ☐ Verify CTAs use **invitational style**

Expected Result: Preview shows all active CTAs with validation status.

Test 6.4: CTA Analytics

1. ☐ Click **“View Analytics”** (if button exists)

2. ☐ Verify analytics dashboard appears with:

- ☐ **Total Impressions**
- ☐ **Total Clicks**
- ☐ **Click-through Rate**
- ☐ **Recent Activity**

3. ☐ Verify data is aggregated over **last 30 days**

4. ☐ Verify breakdown by **CTA type** and **platform**

Expected Result: Analytics display impressions, clicks, and breakdowns.

TEST SUITE 7: RESPONSIVE DESIGN (5 minutes)

Test 7.1: Mobile Layout (375px width)

1. ☐ Open DevTools (F12)

2. ☐ Set viewport to **375px × 667px** (iPhone size)

3. ☐ Navigate to **Dashboard** page

4. ☐ Verify:

- ☐ Sidebar collapses or becomes hamburger menu
- ☐ Filters stack vertically
- ☐ Trend cards display in single column
- ☐ Buttons are touch-friendly (min 44px height)
- ☐ No horizontal scrolling

5. ☐ Open an **article** page on mobile

6. ☐ Verify content is readable (no overflow)

7. ☐ Click **Generate Social Posts**

8. ☐ Verify cards stack vertically

Expected Result: All pages are responsive and mobile-friendly.

Test 7.2: Tablet Layout (768px width)

1. ☐ Set viewport to **768px × 1024px** (iPad size)

2. ☐ Navigate to **Dashboard**

3. ☐ Verify layout is balanced

4. ☐ Verify article editor is usable (no text field overflow)

Expected Result: Tablet layout is readable and usable.

✓ TEST SUITE 8: PERFORMANCE & ERRORS (5 minutes)

Test 8.1: Console for Errors

1. ☐ Open DevTools → **Console** tab
2. ☐ Navigate through all pages
3. ☐ Verify **NO errors** appear in console
4. ☐ Verify **NO red error messages** are shown
5. ☐ Look for hydration errors (should be none)

Expected Result: Console is clean with no errors.

Test 8.2: Network Performance

1. ☐ Open DevTools → **Network** tab
2. ☐ Reload **Dashboard** page
3. ☐ Verify:
 - ☐ All requests complete (no red failed requests)
 - ☐ No 4xx or 5xx HTTP errors
 - ☐ Largest assets load under 1 second
4. ☐ Generate an article and watch network requests
5. ☐ Verify streaming response works

Expected Result: Network requests complete without errors.

Test 8.3: Page Load Speed

1. ☐ Open DevTools → **Performance** tab
2. ☐ Record page load on **Dashboard** page
3. ☐ Verify **First Contentful Paint (FCP)** is under 2 seconds
4. ☐ Verify **Largest Contentful Paint (LCP)** is under 3 seconds
5. ☐ Repeat for **Article Editor** page

Expected Result: Pages load within acceptable performance metrics.

✓ TEST SUITE 9: CROSS-BROWSER TESTING (5 minutes)

Test 9.1: Chrome/Chromium

1. ☐ Open app in **Chrome** browser
2. ☐ Run quick smoke test:
 - ☐ Login works
 - ☐ Dashboard loads
 - ☐ Start article wizard
 - ☐ Generate article
3. ☐ Verify no console errors

Expected Result: All features work in Chrome.

Test 9.2: Safari

1. ☐ Open app in **Safari** browser
2. ☐ Repeat smoke test
3. ☐ Verify no console errors

Expected Result: All features work in Safari.

Test 9.3: Firefox

1. ☐ Open app in **Firefox** browser
2. ☐ Repeat smoke test
3. ☐ Verify no console errors

Expected Result: All features work in Firefox.

TEST SUITE 10: DOCUMENTATION (2 minutes)

Test 10.1: Documentation Accessibility

1. ☐ Navigate to **<https://aitrendshub.abacusai.app/docs/>**
2. ☐ Verify list of PDFs appears
3. ☐ Download/view:
 - ☐ **USER_GUIDE.pdf** — All user features
 - ☐ **CONTENT_CREATION_WORKFLOW.pdf** — Technical workflow
 - ☐ **TASK_CHECKLIST_AI_TREND_HUB.pdf** — Project completion status
4. ☐ Verify PDFs are readable
5. ☐ Verify PDFs mention:
 - ☐ Draft management
 - ☐ Social media preview cards
 - ☐ Publish status indicators
 - ☐ Content freshness badges
 - ☐ Session expiry handling

Expected Result: All documentation accessible and current.

FINAL SIGN-OFF

Summary

Total tests: **57 individual checks**

After completing all test suites, fill in:

- **Date Tested:** _____

- **Tester Name:** _____
- **Browser(s) Tested:** _____
- **Issues Found:** _____
- **Critical Issues:** ☐ None / ☐ Some
- **Ready for Production:** ☐ Yes / ☐ No

Sign-Off

I certify that all features have been tested and the application is ready for production use.

- Signature: _____
- Date: _____

TROUBLESHOOTING

If you encounter issues:

1. **Check browser console for errors** (F12 → Console)
2. **Clear browser cache** and retry
3. **Try in incognito mode**
4. **Check internet connection**
5. **Contact support** if issues persist

END OF USER FRONTEND TEST CHECKLIST

All 57 tests should pass before project handoff.
